

Nursery

Day of the Week	Activity
Monday	Hide and Seek: Detective Style!
Tuesday	Battleships!
Wednesday	Wacky Races
Thursday	A Doctor's Diet
Friday	Kids Choice: Cosmic Kids Yoga

Monday –

Hide and Seek: Detective Style!

- You'll need at least one other person to play this game.
- Pick out 10-12 toys/objects (take a picture so you can remember what you have hidden!)
- The 'police officer' has to cover their eyes whilst the other player hides the toys (criminals)
- Once hidden, the 'police officer' has to try and find all of the criminals that have escaped!
- You can time it if you want!
- Once you have played – swap roles!

Tuesday – Battleships!

- For this game you'll need to make a ball out of some rolled up socks and an opponent.
- Pick out some soft toys as targets and take it in turns to throw the 'sockballs' at the targets.
- If a player hits a target – they get to keep it. Whoever hits the most wins!
- When you start to get better use smaller targets or move your targets further away!

How do I do that?

What do I need to learn?:

Throwing for accuracy

When throwing for accuracy it is best to throw under-arm, with a slight bend in the knee. On release the children should point their fingers at their target, moving their arm in a steady motion

Wednesday – Wacky Races

- This is one very simple. You can make a circle, square or move in straight line.
- All you have to do is to pick 3 different ways of moving your body and then have fun either racing each other or working as a team and timing each other!

Frog Jumps

Hopping

Bunny Hops

Bear Crawl

Skipping

Pencil Rolls

Wriggle like a snake

Hopscotch

Fly like a plane

Thursday – A Doctor's Diet!

- One of the many jobs for a Doctor is to help people each a healthy diet.
- For this game your child will need someone to play against.
- In your playing area you'll need to starting points (place the child closer) – then spread out different types of food out in your space (not from the freezer though!)
- When the game starts players must run out and grab an item of food to take back to their starting point. Keep this going until all objects have been collected!
- Then work out who has won. All food collected is worth one point, but the super healthy foods are worth 5!

Friday – Cosmic Kids Yoga

- Happy Friday!
- On ‘Youtube kids’ you’ll find a channel called ‘Cosmic Kids Yoga’
- This lady matches yoga moves to famous books/films/computer games
- Choose one and give it a go, yoga is fantastic at improving core strength, flexibility and co-ordination!

“I can do that.... What’s
next?”

Progressions: Balance

- Children can maintain balance when performing a task on one leg (this applies when static or when moving) (Develop through setting challenges where children must perform tasks on one leg. I.e – Throw and catch bean bag with alternate hands on one leg – Individual or as pairs)
- Children can maintain their balance whilst standing on one foot (Set time challenges, use apparatus to focus children. Encourage the children to look at something that is level with their eyes – ears govern our balance! Some children will initially find it easier balancing with a bend in their knee, allowing the Quadriceps to contract slightly and control their body)
- Children maintain their balance whilst standing in a stationary position and performing a task (2 feet) (Develop by asking children to balance a bean bag on their shoulder>back of hand>head>on head whilst holding arms out and touching nose with one hand)
- Children maintain balance when standing in a stationary position on the floor (2 feet) (Develop this skill through activities involving a 'freeze' OR ask children to balance objects on particular parts of their body. I.e - Bean Bag/Cone)

As children develop their balance, ask them to hold their limbs further away from their core!

Increase in
Complexity
of Skill

Progressions: Catching

- 
- Standing — Using two **bean bags!**
 - Standing — Practice catching with a **medium sized ball**
 - Resting on knee's — Practice catching with a **medium sized ball**
 - Sitting — practice catching with a **medium sized ball**
 - Standing — Practice catching with a **bean bag**
 - Resting on knee's — Practice catching with a **bean bag**
 - Sitting — practice catching with a **bean bag** (doesn't roll away!)

Individual

- Standing — Using two **bean bags!**
- Standing — Practice catching with a **medium sized ball**
- Resting on knee's — Practice catching with a **medium sized ball**
- Sitting — practice catching with a **medium sized ball**
- Standing — Practice catching with a **bean bag**
- Resting on knee's — Practice catching with a **bean bag**
- Sitting — practice catching with a **bean bag** (doesn't roll away!)

In Pairs

- Large group working in a set space, one child acts as the DEF, the rest keep **ball** away from DEF
- Standing in a circle, no adult in the middle, practice catching with a **medium sized ball**
- In a circle, no adult in middle, practice catching a **bean bag**
- Standing in a circle, adult in the middle, practice catching with a **medium sized ball**
- Standing in a circle, adult in the middle, practice catching with a **bean bag**

In a Small Group

Complexity
of Skill

Progressions: Running & Stopping

- Children maintain balance when moving fast in all directions & changing directions. Children react to variables and maintain balance whilst moving in a range of directions and stopping with competency (**Development would now begin to integrate other factors such as another FMS – Kicking, Catching, Throwing, Jumping etc**)
- Children maintain their balance when changing direction in a regimented fashion, show an understanding that not crossing legs when changing direction helps them to maintain balance (**Development would then focus on activities/games requiring children dodging, chasing, avoiding moving objects/people**)
- Children maintain their balance when moving forwards, show an understanding that bending at the knee helps them to stop quickly. Struggle to maintain balance when changing direction in a regimented fashion (I.e Running in & out of cone slaloms)
- Children show a clear in-balance when moving forwards at any pace faster than walking. Need to numerous steps when coming to a stop (**Development would focus on lots of activities/games requiring straight line running**)

When changing direction
DON'T cross your feet!

Increase in
Complexity
of Skill

Progressions: Throwing

- 
- Can utilise the over-arm throw to throw to a target/area with moderate success (a greater distance away)
 - Begins to use the over-arm throw to throw over a greater distance
 - Can throw objects under-arm to targets 3-4 metres away with moderate success
 - Can throw objects under-arm to targets 1-2 metres away with moderate success
 - Can throw objects under-arm in a general direction with a degree of success (i.e – Forwards)

Individual

- Can utilise the over-arm throw to throw to the chest with moderate success (a greater distance away)
- Begins to use the over-arm throw to throw over a greater distance (close to partner's chest)
- Can throw objects under-arm to chest 3-4 metres away with moderate success
- Can throw objects under-arm to chest 1-2 metres away with moderate success
- Can throw objects under-arm in a general direction with a degree of success (i.e – Towards their partner)

In Pairs

- Children select appropriate types of throw, reacting to changing situations in game play successfully (bounce pass to avoid defender)
- Children can use teaching points to successfully complete different types of throw on command
- Children can list the teaching points of different types of throw (I.e – How to perform a chest pass/bounce pass)
- Takes part in activities using one type of throw
